

January 30, 2020

Mr. John Schutte
AFRL 711th Human Performance Wing
2610 Seventh St.
Wright-Patterson AFB, OH 45433

Dear Mr. Schutte:

It is our great pleasure to inform you that “Multi-Modal Communication (MMC)” has been selected to receive a 2020 Excellence in Technology Transfer Award from the Federal Laboratory Consortium for Technology Transfer (FLC). The FLC is the Congressionally mandated organization that educates, promotes, and facilitates Federal Technology Transfer.

From among the 300 plus Federal laboratories supported by the FLC, the Excellence in Technology Transfer Award is presented annually to laboratory employees who have accomplished outstanding work in the process of transferring federally developed technology. This year your laboratory is one of a select number of recipients, an indication that your nomination was truly of the highest caliber.

In recognition of their hard work and dedication in promoting technology transfer, your team will be honored at an award ceremony on Thursday, April 30, 2020 at the FLC National Meeting in Portland, Oregon. As a winner of the FLC Excellence in Technology Transfer Award, up to two members of the award-winning team are invited to attend the 2020 FLC awards ceremony as a guest of the FLC (free registration for the Award Reception/Dinner). The other remaining team members are invited to attend the Award Reception/Dinner as well, however, they would need to pay a registration fee. The winners are also invited to submit a poster about their award-winning technology transfer effort for exhibition at the FLC National Meeting. The FLC will be in contact with you in the coming weeks to provide details about how your winners may register to participate in the ceremony and the poster session at the National Meeting.

On behalf of the FLC, we extend our sincerest congratulations on a job well done.

Sincerely,

John Dement
FLC Chair

Dr. Whitney A. Hastings
FLC Awards Committee Chair
